

Behavioral, Spatial, and Kinship Predictors of Women's Cooperative Ties

**Hair grooming ties**      **bond friendships**      **cash exchanges**

**Birth Location Closeness**      bond friendships      cash exchanges

Geographic Proximity

# Clan Homophily

# Preliminary Results

## Behavioral, Spatial, and Kinship Predictors of Women's Cooperative Ties

**Hair grooming ties:** *Positively* linked to **bond friendships** and **cash exchanges** (Shared grooming drives friendship? Reciprocity?)

**Birth Location Closeness:** *Positively* linked to **bond friendships** and **cash exchanges** (Women rely on natal-community ties)

**Geographic Proximity:** *Positively* linked to **bond friendships** and **cash exchanges** (Neighbors cooperate more)

**Reproductive Similarity:** *Positively* linked to **bond friendships** (Mothers with similar childcare demands cooperate more?)

**Clan Homophily:** *Positively* linked to **cash exchanges** (Norms for patrilineal kin-biased material exchange; alliance-based reciprocal exchange)

**Other Homophily Measures:** No relationship
